

Evolution of StruxureWare Data Center Operation

StruxureWare Data Center Operation (DCO) is a Schneider Electric world-class data center infrastructure management (DCIM) software product for the planning and modeling of data center and colocation environments. As part of the standard upgrade path, DCO was rebranded as EcoStruxure IT Advisor in 2019 to make it easier for you to navigate our portfolio and select the right EcoStruxure solutions for your data center management needs.

Upgrading from Data Center Operations to EcoStruxure IT Advisor has a number of benefits for customers. It entitles customers with an active software maintenance contract access to the many new releases each year, including bug fixes, security enhancements, and new feature deliveries. IT Advisor has an enhanced web-browser experience, allowing more users to utilize the product without requiring its desktop client. It also is now available for customers either as an on-premises or cloud-hosted solution.

As part of this migration, the end-of-version date for StruxureWare Data Center Operation and its modules (i.e. DCO v8.x and all prior versions) is scheduled for January 1, 2022. Please note that certain stand-alone DCO module availability has changed or merged after the version change from 8.x to 9.x. As we keep working towards fulfilling your DCIM needs, we will be providing improved replacement functionality for many of the discontinued modules within the active EcoStruxure IT Advisor suite. For example, the **Colocation** module is already available now for free within the EcoStruxure IT Advisor base module, and the **Insight** module has been reinterpreted with various reporting solutions within the base module.

Here is a table summary of the evolution of the **DCO modules with migration to EcoStruxure IT Advisor suite**:

Discontinued DCO module	Availability in EcoStruxure IT Advisor	EcoStruxure IT Advisor module name
DCO Operations base	Available	ITA Colo
DCO Colo	Available	
DCO Energy Cost	Available	
DCO High Availability	Available	
DCO Capacity	Available	ITA Capacity
DCO Change	Available	ITA Change
DCO IT Optimize	Available	ITA IT Optimize
DCO Cooling Optimize	Available	ITA Cooling Optimize
DCO Energy Efficiency	Compatible for existing Energy Efficiency customers only.	ITA Energy Efficiency
DCO Insight	Limited functionality available for existing Insight customers only. Ask your sales representative about functional replacement.	ITA Insight
DCO Portal	Unavailable. Ask your sales representative about functional replacement.	
DCO Data Center Lab	Unavailable	
DCO Server Access		
DCO IT Power Control

DCO customers are encouraged to work with their Schneider Electric account representative to navigate the changes.

We hope these changes will reinforce the value that our EcoStruxure architecture can deliver to your business to boost your competitiveness in this fast-paced digital economy.

As always, should you have any questions, please do not hesitate to contact me.

Kind regards,

Authorized Signature and Date

Cyrielle Beizama
